ABSTRACT and CONTENTS

This document describes in detail the calls that can be made to the basic system to manipulate objects in MIB's.

The object table in the MIB has 128 entries. The letter (T) is used in some definition of terms to denote what type of formal argument is expected by the function. (T) is defined as follows:

- T = \emptyset 1 word of value expected
- T = 1 2 words of value expected
- T = 2 4 words of value expected
- T = 3 label expected
- T = 4 array descriptor expected
