VERSION 1.0

I. Product Identification

- A. Proposed Name: Chippewa Operating System, Version 1.0
- B. Project Number: 4C653
- C. Software Product Number: E012

II. Product to be Developed

COMPANY PRIVATE

- A. Software:
6400/6600 interim Operating System as described in existing Chippewa Operating System Reference Manual, publication No. 60134400.
- B. Customer Documentation and Promotional Material:
To be determined by Department 241.
- C. Design Documents:
The existing Reference Manual will suffice as an ERS. A satisfactory IMS has been developed by the Training Section of Systems Installation.

III. Design Requirements

- A. Justification:
This will be the interim standard operating system for the 6400/6600 as defined by the Software Product Plan.
- B. External Design Objectives:
The design objectives are spelled out in the existing Chippewa Operating System Reference Manual.
- C. Internal Design Objectives:
- D. Time Phasing:
The system is available now.

IV. Machine Configuration

6415 or 6614 Central Computer, 6612 Display, 6603 Disk, 405 Card Reader, 501 Printer, 415 Punch, and a 607 Tape Drive.

DOCUMENT CLASS STR WRITTEN W. H. Moehrke 236 DATE March 3, 1966

SYSTEM NO. E012 VERSION 1.0 MACH. 64/6600 CHANGE NO. _____ DATE _____

V. Software Relationships

64/6600 ASCENT Version 1.0 and 64/6600 FORTRAN Version 1.0
will run under the Chippewa Operating System Version 1.0.

VI. Standards

- A. National:
None applicable
- B. Applications:
None applicable

VII. Other Actions Required

None required

VIII. Recommended Responsibilities

- A. Design and Implementation have been done by the Chippewa
Laboratory.
- B. Support will be provided by Department 236.
