# Open up to the possibilities!
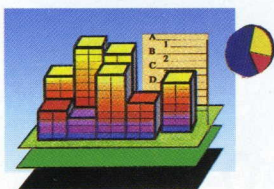

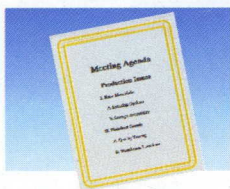

Ⅱ DIGITAL RESEARCH®

DESKTOP™

Point and click! This simple, menu-driven graphics interface lets you run all GEM® applications using your mouse and execute DOS commands instantly for efficient file management. Your fastest way to move ahead.

DRAW PLUS™

For designs that really draw the eye. Create everything from architectural renderings to organizational charts, using a vast array of shapes, circles, lines and patterns. Combine your own designs with pre-drawn images, charts and symbols in the picture library. Duplicate, rotate and magnify your drawings!

GRAPH™

Exciting graphs make facts come to life. Use two- and three-dimensional bar graphs, pie charts, simple line graphs and more in slides and overhead presentations, or incorporate them into newsletters or documents. Import data from other programs and revise instantly.

1ST WORD PLUS™

The last word! Opens up to 4 windows simultaneously, formats text automatically and integrates graphics into text. Includes standard word processing features such as mailmerge and spell checking, *plus* Paint™ for creating customized images.
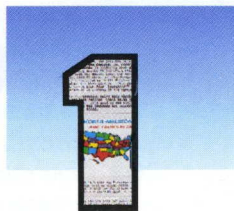

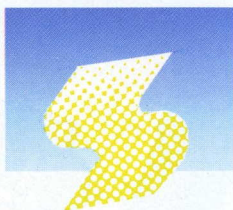

WORDCHART™

Organization makes a great impression. Pre-constructed formats let you create and customize agendas and other text charts. Print out on paper, overhead slides or transparencies, in color or black and white. Gives your ideas the best presentation.

SCAN™

Import any image or photo into your document – crop, flip, rotate and edit to the pixel level with built-in magnifier. The perfect companion to popular desktop publishing programs.

When you want powerful, versatile graphics applications and operating systems, look to Digital Research, the industry leader. We were the first company to offer a graphical interface for the PC and pioneered microcomputer operating systems by developing CP/M®, the first disk-based operating system. Today, we're a multinational corporation, offering graphics programs, operating systems and development tools. Our wide range of technology includes not only publication and presentation graphics, but multiuser/multitasking support and true, real-time industrial system software.
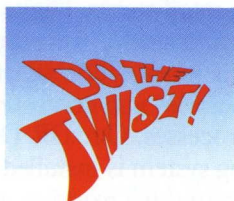

ARTLINE™

The tool that gives you the talent! You get a vast array of special graphics effects for logos and letterheads. Create stunning visuals and combine with a library of shapes, lines and clip art. There's no limit to what you can do—even prepare your own color separations!

DESKTOP PUBLISHER™

The award-winning (Editor's Choice, PC Magazine) way to make the news. It's simple to create outstanding newsletters, brochures, reports and manuals, with professional typographic capabilities such as kern, wrap, drop in and rule. Makes everyone want to "read all about it!"

▢▢ DIGITAL
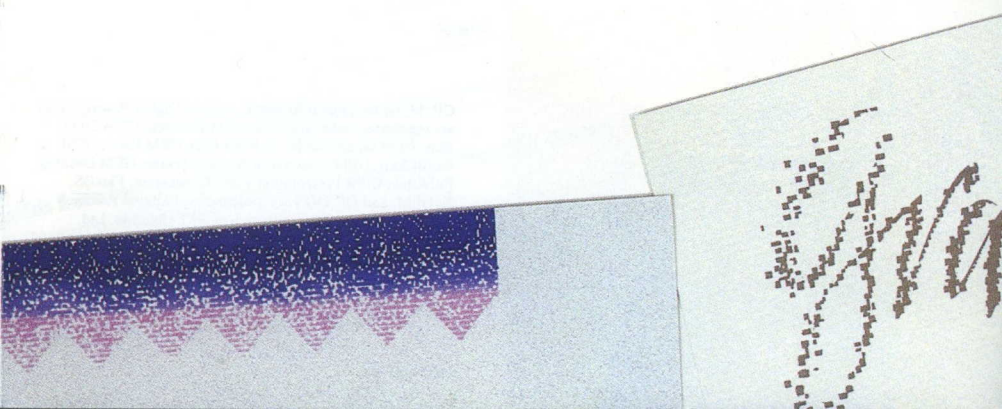

Our innovative line of graphics applications opens up the excitement of publication and presentation graphics as never before. These advanced programs put professional graphics capability right into your hands, giving you dazzling results at the click of a mouse. And every program employs the same, easy-to-use graphical interface.

Digital Research operating systems offer solutions for everybody. Affordable and DOS compatible, they support an almost endless variety of popular business applications. You save time and money, thanks to their quick, menu-driven installation, convenient features and short learning curve.
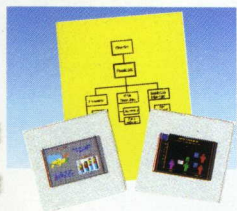

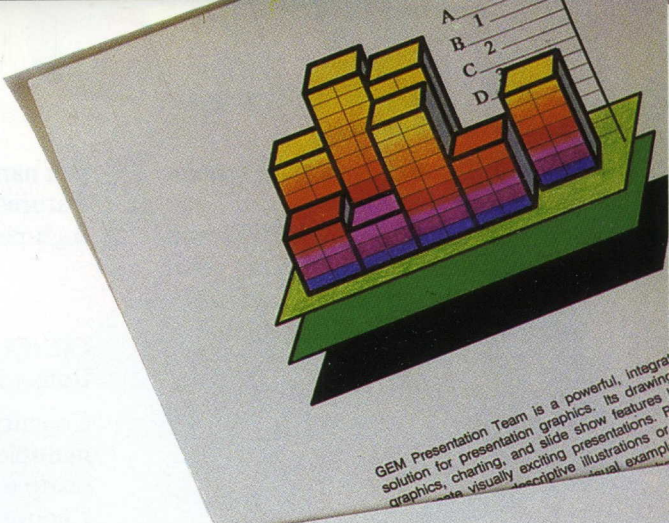

PRESENTATION TEAM™

Everything you need for a smooth, impressive presentation! Gives you the tools to create charts, graphics, agendas and tables – a vast selection of striking, integrated visuals that put your message across powerfully, on slides, transparencies or in print. It's easy to get noticed!

DIGITAL RESEARCH
Is Going Places In Computers

Today more than ever before, Digital Research products are an integral part of business and everyday life. Our sophisticated FlexOS™ and X/GEM®™ systems make shopping more convenient by running cash registers and simultaneously maintaining inventory in retail stores. Digital Research products also run automatic teller machines, guide robot arms in factories and control industrial processes. Our DR DOS™ operating system is installed in computers around the world as an improvement over DOS.

Professional developers use Digital Research System Builder's Kits to configure operating systems and Programmer's Toolkits to develop programs for specific applications.

At Digital Research, we believe that software should expand your horizons, delivering all the efficiency and creativity that your hardware promises. Whether in business, industry or personal computing, we're turning advanced concepts into practical solutions for you.
