FRONTLINE PARTNERSHIP

INTRODUCTION

Compaq, the number-one server provider for small businesses, and Microsoft, the leader in network software, have combined forces to create an easy-to-use, affordable integrated hardware and software solution to meet the networking needs of today's small business. Based on the Compaq ProSignia 200 and Microsoft® BackOffice™ Small Business Server, the Compaq Small Business Server¹ allows businesses to connect to customers, suppliers and other employees with ease. It provides "one-stop shopping" for everything small businesses need to setup and run their network. And with Compaq's legendary quality and service and support options, it's a breakthrough solution for small businesses.

DESIGNED FOR SMALL AND GROWING BUSINESSES

The Compaq ProSignia 200 Small Business Server has been designed to address the specific needs of small and growing businesses. The standard offering is targeted at businesses that require a single server to manage all of their computing requirements and who have 25 or fewer PC users connected to the server.

The Compaq ProSignia 200 Small Business Server allows you to:

- Send and receive mail across the room, across the country, or across the world.
- Share data between multiple employees. This can ensure that data can be centrally managed so those duplicated files are eliminated.
- Connect securely to the Internet. You can choose to host a local WEB server to extend your business presence on the Internet, or contract with an Internet service provider for Web hosting services.
- Send and receive FAX messages from your PC. Generate a FAX on your PC, and from there send it to the other side of the world as easily as you would print it.
- Backup and protect your organization's information centrally. Ensuring that all your valuable data is protected.
- Share peripherals, such as printers and modems, among multiple employees, minimizing costly hardware purchases.
- Choose from thousands of additional applications compatible with the Microsoft Windows platform.

All of this functionality can be centrally managed from an easy-to-use console that requires a minimum of computer knowledge.

The Compaq ProSignia 200 Small Business Server is now available with an Intel® Pentium II 300MHz processor and ECC memory to provide small businesses

with even greater power and reliability to meet their computing needs.

COMPREHENSIVE SOFTWARE SUITE

The Compaq ProSignia 200 Small Business Server Hardware comes with a comprehensive suite of software products from both Compaq & Microsoft that provides you everything you need to run your growing business. The software components include:

Licenses to connect 10 Clients (desktop or portable PCs), to the server - Additional Licenses up to the 25 user maximum, are available in 5 user increments.

Compaq SmartStart for Microsoft BackOffice Small Business Server - Ensures that server configuration goes simply and smoothly.

Microsoft Windows NT® Server 4.0a - The latest version of the network operating system that is the foundation for your applications.

Microsoft Internet Information Server - The platform for connecting your business to the Internet.

Microsoft Exchange Server with Microsoft Outlook™ desktop information manager - Automates calendaring and task management, while connecting your business through e-mail to the world.

Microsoft FAX Server - A centrally managed application for sending and receiving faxes from desktop PCs.

Internet Connection Wizard - Helps locate and sign on with an Internet Service provider.

Microsoft FrontPage® 97 - A tool to help create and manage professional WEB sites.

Microsoft Proxy Server - Improves the speed and security of Internet Access for desktop PCs.

Modem Sharing Server - Makes it easy to share modems from a central location.

Small Business Server Console - Provides an easy-to-use administrative tool for common tasks.

Compaq Insight Manager - Provides a graphical tool that can be used to manage your Compaq server from your desk, a remote location or have your supplier monitor it for you.

Microsoft SQL Server - The database foundation for your business applications.

¹ Initial announcement in North America only. For additional information on future worldwide announcement dates, please contact your Compaq representative.

COMPAQ QUICKSPECS *(cont'd)*

EASY TO UPGRADE

Think you will grow out of your server? Compaq and Microsoft have provided you with an easy upgrade path. Your Compaq ProSignia 200 Small Business Server is easily upgradeable with additional memory and drive capacity and includes available slots for card expansion. Customers who outgrow the 25 user limit of Microsoft BackOffice Small Business Server can upgrade to Microsoft BackOffice to get the full unlimited potential of all of their applications. Upgrading to Microsoft BackOffice provides the capability to scale to unlimited users (with the appropriate client access licenses), as well as providing connection software (SNA Server) and Advanced Systems Management (Microsoft SMS), while retaining the unique features of Microsoft BackOffice Small Business Server.

OPTIMUM RELIABILITY

Because running your business is more important than running your computer network Compaq has built a number of reliability features into the server to give you peace of mind. These include:

- Error Checking and Correcting (ECC) Memory
- SMART, self error detecting Disk Drives
- Server Class SLR SCSI Tape Drive
- Automatic Server Recovery

Compaq also provides, Compaq Insight Manager enabling you or your reseller to be notified should any problems occur.

COMPAQ CAPITAL LEASING

To help small business owners get up and running with the latest technology without breaking the bank, Compaq Capital offers attractive leasing and financing solutions that meet today's budget needs while providing flexible upgrade options in the future².

EXTENSIVE SERVICE AND SUPPORT OFFERINGS

As well as toll-free hardware technical support (7x24), direct from Compaq, an extensive set of support options is open to Compaq small business customers. The Compaq Software Application Support Center will provide support for many popular business software applications suites such as Microsoft Office, Lotus SmartSuite and Corel WordPerfect Suite. You can sign up for this service through your reseller.

Customers can also take advantage of Compaq Fee based support for Windows NT Microsoft BackOffice Small Business Server.

Free support of in-warranty Compaq server hardware is available by calling our Technical Support Center at 1-800-386-2172. Customers can also obtain technical support via Compaq's Internet WEB site at www.compaq.com.
