QLOGIC®

Introducing the simplest SAN on the planet: (again!)

The HP StorageWorks MSA1000 Small Business SAN G2 Kit

Easy to buy: One part number includes everything you need – hardware and software - in one box. Including new 4Gb, PCI-Express Fibre Channel HBAs and 10-port 4Gb Fibre Channel switch.

Easy to install: Step-by-step installation poster and installation Wizards make it virtually foolproof. Install the software with only mouse clicks in minutes! Data migration can happen in minutes with HP DAS-to-SAN (DtS).

Easy to manage: Use SANsurfer Express to manage the switch, HBAs and Modular Smart Array. Now with ADG RAID (RAID 6) support.

Easy to upgrade: Add the HP StorageWorks MSA1000 Small Business SAN HA (High Availability) G2 Kit for redundant, dual-path, storage access – add up to 9 servers - connect two kits together to share one tape backup library. Add servers using the new QLE220 PCIe 4Gb HBA (AG527A), now with x64 server support!

Best value: Thousands less than building a SAN from scratch, plus dramatically lower Total Cost of Ownership (TCO) thanks to revolutionary hardware and incredibly simple management software. Volume management, multi-path, switch and HBA management software included at no extra charge. Now with Active/Active controller support for the MSA1000

MSA1000 Small Business SAN Starter G2 Kit (AG525A)

- (1) MSA1000 enclosure with controller
- (1) 4/10q Fibre Channel Switch
- (2) QLE220 (AG527A) 4Gb, PCIe Fibre Channel HBAs
- (1) Software CD
- (3) 5m Fibre Channel cables
- (4) SFP's

MSA1000 Small Business SAN HA G2 Kit (AG526A)

- (1) MSA1000 controller
- (1) 4/10q Fibre Channel Switch
- (2) QLE220 (AG527A) 4Gb, PCIe Fibre Channel HBAs
- (1) Software CD
- (3) 5m Fibre Channel cables
- (4) SFP's
