Compaq StorageWorks

Fibre Channel Disk Drive Replacement Instructions

Open Card Completely Before Beginning Installation Procedures

259299-001

About This Card

This installation card describes the procedure for replacing a Fibre Channel disk drive. This disk drive may be used with the *Compaq StorageWorks*™ Enterprise Virtual Array.
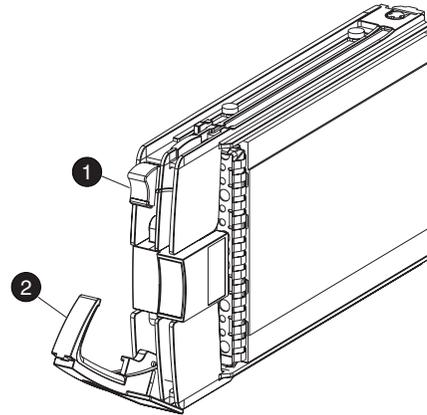

Replacing the Disk Drive

Complete the following procedure to replace a disk drive.

> **CAUTION:** Remove only one drive at a time to avoid overheating the enclosure and install a drive of equal or greater capacity or a drive blank.

1. Push in on the disk drive Ejector Button ❶ (see Figure 1), and pivot the Release Lever ❷ to the full, open position.

2. Pull on the drive until it is disconnected from the backplane connector.

> **CAUTION:** The carrier can be dropped due to the rapidly rotating media. Remove the carrier from the enclosure when the media has stopped rotating. This takes approximately 30 seconds.

3. When you are sure that the media is no longer spinning, completely remove the drive from the enclosure.

4. Insert the replacement drive into the enclosure until the drive is against the backplane connector.

5. Push in on the replacement drive while pivoting the Release Lever ❷ to the full upright position.

6. Push the Release Lever in until the lever engages the Ejector Button ❶, and the drive is fully seated in the backplane connector.

7. Observe the drive status LEDs to ensure the replacement drive is functioning properly. Refer to your drive enclosure user guide for specific details.
