

Faxination® from Fenestrae

Adding Fax, Telex, and Wireless Capabilities to Exchange

Fenestrae®

www.fenestrae.com

Preparing faxes for traditional fax machines and distributing faxes by hand is time-consuming and expensive. If you're traveling, you have to rely on the fax services of a hotel. Now there's a better way: Faxination.

Faxination expands the messaging capabilities of Microsoft® Exchange, Microsoft Mail, and SAP R/3 to include fax, telex, and wireless communications. As a Windows NT®/Exchange-based server, it expands the messaging capabilities of any SMTP-compliant e-mail system by enabling you to send and receive fax and telex messages from your desktop environment — just like standard e-mail. It also lets you send mobile (pager) messages from your desktop.

Faxination is part of the *Compaq Business Solutions for Exchange* program for Messaging and Collaboration. As such, it is a key part of the *Compaq NonStop™* eBusiness strategy — a commitment to help you achieve the highest levels of continuous electronic commerce through solutions, services, products, and technology, positioning you to compete effectively in today's global 24 x 7 marketplace.

Seamlessly Integrated with Microsoft Exchange

Designed specifically for Microsoft Exchange, Faxination allows you to fully leverage your Exchange investment since all the administration is performed at the server level. By delivering the highest level of integration with Microsoft Exchange, Fenestrae makes business communications an easy and cost-efficient part of the work process.

Easy to install, use, and manage, Faxination brings bottom-line benefits to your company by reducing your telecommunications costs and providing low total cost of ownership. Best of all it is secure and reliable, and is designed to grow as your communications expand.

Faxination features include:

- Integrated Address Book (leverages Outlook® Contacts database, Personal Address Book, etc.)
- Enterprise Logging
- Windows NT Event Viewer/Performance Monitor Support
- Direct Inbound Routing
- IBM S/390 & AS/400 Integration
- SMTP Compliant Systems
- Customized Fax Coversheet
- Support of Direct Attachments (i.e. Word, Excel, PowerPoint®, PDF, ASCII, Visio)
- Use of All Microsoft Exchange and Outlook Client Features and Fonts
- OLE Drag and Drop
- Integration with Lucent Technologies Unified Messenger (v2.0 and higher)

COMPAQ

Faxination from Fenestrae is part of the
Compaq Business Solutions for Exchange
program. As the first program of its kind to
offer tested, complete solutions on the
Compaq and Exchange messaging platform,
Compaq Business Solutions for Exchange

helps you enhance efficiency, improve
workflow, and realize greater productivity
as a result of your Exchange investments.

Working Together for You

Fenestrae and Compaq have formed a Messaging Alliance — teaming Compaq platforms and services with Fenestrae messaging solutions. Through this alliance, enterprise and service provider customers will benefit from state-of-the-art messaging solutions and faster deployments using an open, industry-standard solution.

Fenestrae's Network

Fenestrae is a privately-owned software vendor with operations in the U.S., U.K., Europe, Hong Kong, and Australia. The company offers true integrated fax/messaging solutions for Microsoft Exchange and SAP. Installed in more than 50 countries, Faxination is sold through a worldwide network of select Value Added Resellers (VAR) and distributors, specifically Microsoft Certified Solutions Providers.
