hosted messaging
and collaboration solution

hp solutions and services

With wide pipelines to the Internet and the security and reliability of data center architecture, service providers are in a singular position to ensure the ongoing availability and ubiquitous access that businesses want in a messaging and collaboration infrastructure. As companies look to optimize operating costs while still improving worker productivity, outsourcing of their messaging infrastructure and operations becomes an attractive solution.

hp delivers a total hosted messaging and collaboration solution

HP offers a total solution that enables service providers to deliver cost-effective, secure, collaborative messaging services in a shared infrastructure model.

complete lifecycle services include:

- Assessment, installation and startup services
- Microsoft® Gold Certification and HP Service Provider Certification services
- Remote management of the Microsoft Exchange Server environment
- Help desk support
- Migration services

platform

Co-developed with Microsoft, the solution is built on industry-leading ProLiant servers from the new HP and HP StorageWorks storage area network (SAN), and utilizes our award-winning remote management capabilities.

added value

HP and Microsoft offer numerous planning and sales tools to help the service provider train a sales force and sell the service to corporate users.

solution benefits:

- *Rapid time to revenue* – Save months in development and testing
- *Built for growth* – Designed to start small and continue to grow
- *High margin service platform* – Target corporate users with high-value features
- *Reduced operating cost* – Multi-tenant architecture and remote management allow economies of scale
- *Extensible* – Add-on wireless or unified messaging for increased differentiation
