

The Vision For Education That Fits In A Backpack.

In addition to preparing students for the future, one of the biggest challenges facing K-12 educators today is removing barriers to learning. Consider the computer lab. While it's a valuable resource, a lab is only as good as its availability to students. And even when it's open, access is limited to the PCs on hand. Now picture a learning environment where students have their own notebook PCs to explore and learn whenever they want. The Compaq Notebook Network puts the power of a Compaq notebook PC in each student's hands for unlimited access to technology's educational potential.

Anytime Anywhere Learning.

The Compaq Notebook Network puts educational technology where learning happens – in classrooms, at home, in the library and wherever students come together. The result is a barrier-free learning environment, where notebook PCs have done more than complement a school's curriculum, they've helped re-shape it.

More Than A Study Tool.

Teachers, students and their parents are finding out how powerful, unlimited access to a notebook PC can stimulate communication and increase productivity. Whether utilizing reference materials, participating

in interactive lessons, conducting online parent-teacher conferences, or developing anything from book reports to multimedia presentations, Compaq notebook PCs are becoming more integral to the daily school routine. Connecting to the Internet is more convenient – allowing teachers to easily incorporate Web content into lessons. All students benefit from increased access to resources in their library, and from libraries around the world. And just using a notebook PC every day promotes skills that will benefit students throughout their education and into the workplace.

Why Compaq?

Just providing the PCs is an adequate solution for many schools' objectives. But schools with the goal of implementing a complete end-to-end solution, where PCs, infrastructure, service and support are all easily managed and available from a single source, are looking to the Compaq Notebook Network. Compaq offers award-winning products like the network-ready Presario 1220ES notebook, specially designed for education environments with LearningPaq software and a comprehensive 3-year limited warranty¹. Or, schools may choose from the complete line of Armada notebook PCs, including the Armada 1500, an all-in-one, fully integrated solution.

Compaq ProSignia and ProLiant servers and Compaq Netelligent products, including routers, hubs, switches, repeaters and NICs, can complete the network.

Compaq Certified Education Partners (CEPs) can provide expert assistance in developing your technology plan, installation services, as well as local service and support to keep your Compaq Notebook Network up and running smoothly. Compaq can even assist in training for those schools that wish to maintain on-site technical support. This versatile lineup of products and variety of customizable configurations allows Compaq to tailor a solution to your specific needs.

Open The Book On An Educational Success Story.

Compaq National Education Pricing makes this solution affordable. Plus, EduFlex finance options allow you to finance the hardware, infrastructure, staff development and ongoing service.

For complete information on Compaq products and pricing, visit our Web site at www.compaq.com/education. Or, for a personal consultation and evaluation of your requirements, call us at **1-800-88 TEACH** today. You'll find out how opening new learning opportunities for your students is as easy as opening a Compaq Notebook PC.
