

Product Code and Configuration Guide for SKA4, SPKA4 and SRKA4

A reference guide to assist customers in ordering components
to configure a “Koa”-based platform.

SKA4 = “Koa” Baseboard, SPKA4 = “Koa/Cabrillo II” Server, SRKA4 = “Koa/D’Iberville” Server.

SKA4 Baseboard Configuration Guide

Product Code: BKO2HE

MM#: 848413

1. SKA4 (“Koa”) baseboards are configured with the following:

1 SKA4 baseboard, with integrated VRM (supporting one processor)

2. They DO NOT contain the following NECESSARY items:

- Processors
- Retention Modules
- Slot2 Termination Cards (see below for table describing VRMs and Term Modules needed - varies with # of processors)
- Additional VRMs (see below for table describing VRMs and Term Modules needed - varies with # of processors.)
- SKA4 SDRAM Memory Modules
- Memory – PC-100 Registered DIMMs

3. To order your NECESSARY items, use the SKU List and/or the following table:
